Exhaust Grilles

RHO R-TYPE

Description

Exhaust aluminium grilles with horizontal adjustable bars.

Characteristics

Material: aluminium

Finish: anodized aluminium, powder coated

Installation: fixing by clips.

Standard Size	Effectife Area	Air Volume
W*H (mm)	(m^2)	(m^3/h)
200x100	0,0162	117
200x150	0,0237	213
250x100	0,0203	183
250x150	0,0297	267
300x150	0,0357	321

Exhaust Grilles

RHO EGG

Description

Exhaust grilles with aluminium frame and egg crate grille 12x12 mm pitch.

Characteristics

Material: aluminium

Finish: anodized, powdser coated

Installation: fixing on wall by clips (holes for screws for ceiling installation on demand)

Free area

Exhaust Grilles

RHO EGG PUSH

Description

Exhaust egg crate grille 12x12 mm pitch for false ceiling installation, with double frame (internal 15 mm) with hinged opening and push-pull system for easy storage and replacement of the filter.

Characteristics

Material: aluminium.

Finish: anodized aluminium, powder coated

Filter: COARSE class (G2) thickness 12 mm.

Opening / closing: push-pull system.

Installation

Installation is carried out by fixing the outer frame of the grille to the wall using screws or in support on structure for paneled ceilings 600x600 mm.

Transfer Grilles

RHO TG

Description

Aluminum Transfer Door Grille with Frame

Characteristics

Extruded aluminum construction
Vision proof
Inverted V type grille bar for best vision proof quality and airflow
Excellent for installation in doors or partitions
Bright White or Satin Anodized finish

Use the engineering data files to determine the proper size to use for maximum performance. Refer to the submittal drawing for key product dimensions.

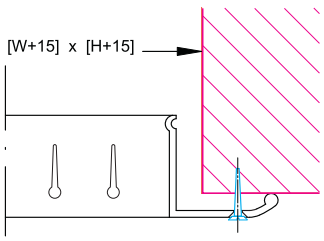
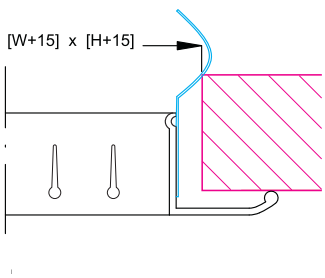
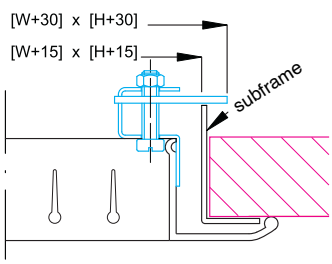
Mounting Types – Application Method

Depending on the installation type and the characteristics of the application area, three different mounting methods are available: screw-mounted, spring clip-mounted, and latch-mounted. The standard mounting method is with screws, and the preferred mounting type should be specified at the time of order.







Screw Mounted

As the standard installation method, the unit is mounted onto the grille frame using air-head screws through pre-drilled M4 metric mounting holes.

Spring Clip Mounting

Spring clip mounting provides effective results in applications with deep seating surfaces. The grille is secured by compressing specially designed steel spring clips on the side surfaces of the frame into the mounting opening. This method can be applied with or without a sub-frame.

Latch Mounting

Latch mounting is ideal for applications requiring easy removal and reinstallation of the grille. The unit is fixed in place using mechanical latches integrated into the side surfaces of the frame, allowing tool-free installation and removal. It can be used with or without a sub-frame depending on the project requirements.
